EDUCATION

Carnegie Mellon University – Heinz College, Pittsburgh, PA, USA Aug 2025 - Expected Dec 2026

Master of Information Systems Management - Business Intelligence and Data Analytics

Coursework: Python, Java, Artificial Intelligence, Machine Learning, NLP, Advanced Business Analytics, Data Analytics, Accounting & Finance, Database Management, Decision Making, Econometrics, Professional Speaking

TECHNICAL SKILLS & CERTIFICATIONS

Programming: Python, SQL, R, Java, C, C++, HTML, CSS, Git

AI, Gen AI & Machine Learning: RAG (Retrieval Augmented Generation), LangGraph, Groq API, OpenAI API, PyTorch, Scikit-learn, NLP, LSTMs, CNNs

Data Analytics & Cloud: Azure (CodePipeline), Power BI, Tableau, NumPy, Pandas, Seaborn, Matplotlib

Professional Certifications: Google Cloud Gen Al Leader | Google Business Intelligence | Google Data Analytics

WORK EXPERIENCE

Cloud & Data Intern | **Quadrant Technologies** | **Redmond, WA** July 2026 - Aug 2026

- Engineered a secure, full-stack AI employee directory using Python FastAPI, Azure SQL, and Azure OpenAI, integrating zero-trust data filters to protect 100% of sensitive employee records.
- Automated Cloud infrastructure provisioning and deployment cycles using Terraform and GitHub actions, while designing SRE pipelines using OpenTelemetry and Grafana to reduce system troubleshooting time.

Data Analyst Intern, Applied Public Policy | **Carnegie Mellon University** | **Pittsburgh, PA** June 2026 - July 2026

- Engineered a predictive power outage forecasting pipeline using LightGBM and PCA to replace baseline SARIMAX models, improving model accuracy and reducing RMSE by 21%.
- Translated forecasting insights into an actionable resource allocation policy, successfully mitigating 87.5% of power outage impacts through optimized, data-driven deployment.

AI & ML Intern | **Defence Research & Development Organisation** | **Delhi, India** Dec 2024 - May 2025

- Developed a RAG-based multi-agent orchestration layer using the Groq API to enable high-speed, parallel processing of complex PDF documents.
- Optimized document retrieval times by 40% while maintaining compliance and accuracy in auditable environments.

Data Science Intern | **Sopra Steria** | **Delhi, India** Aug 2024 - Oct 2024

- Developed interactive Tableau dashboards to analyze 2M+ customer churn records, identifying key user behavior trends.
- Translated visual data insights into targeted customer retention strategies, achieving a 20% increase in retention and driving a $0.5M revenue uplift.

Machine Learning Intern | **Tech Mahindra** | **Delhi, India** May 2024 - July 2024

- Engineered a deepfake detection model using Support Vector Machines to distinguish between authentic and manipulated images, achieving 90%+ accuracy and improving classification by 10%.

Research Assistant | **VIT Vellore** | **India** Sept 2022 - May 2024

- Implemented deep learning models for news classification and personalized recommendation using NLP, LSTM, Bi-LSTM and TextRank, achieving 93.4% accuracy. Conducted model testing and tracked metrics to optimize performance.
- Received VIT Research Award for exemplary IEEE publication and presentation of findings at IEEE AIIoT Conference.

ACADEMIC PROJECTS

- **Housing Market Analysis** | Tableau Dashboard: Implemented K-Means clustering and engineered dashboards to segment housing premiums, visualizing insights on tax incentive inequality and market volatility for low income groups.
- **Automated Breach Monitoring** | WebApp: Architected a Python-based data privacy framework using Shannon Entropy and k Anonymity, mitigating compliance risks to project a 60% reduction in credential exposure.
